- 7** Panel on wall in art gallery explaining work such as Lauren Berkowitz's *Bottles* at NGA "This work is constructed of found objects which commonly end up discarded as litter or as rubbish in landfill. It embraces the history of the objects looking beyond their literal meaning to what they represent historically, spiritually or culturally. Each vessel is prepared by cleaning and removing labels and lids in a process of cleansing and renewal preparing the vessels for the next stage of their existence. All the glass vessels in *Bottles* were once objects which lived in kitchens. At this stage in their lifecycle they would have contained a vast array of ingredients. Instead of discarding the bottles as a "single use" item, the artist honours the longevity of the material transforming the objects through her work. Themes that have been central in her practice include the passage of time, environmentalism, renewal and loss. These themes are inspired by her connection to her Jewish heritage" (sic)
